& People

ON THE HORIZON - Inflation Reduction Act 2022

- \$369 billion for Energy Security and Climate Change Programs

MEMORANDUM

TO: Sustainable Strategies DC Clients & Associates
FROM: Rhea Rao
DATE: August 10, 2022
SUBJECT: Senate Passes Inflation Reduction Act of 2022

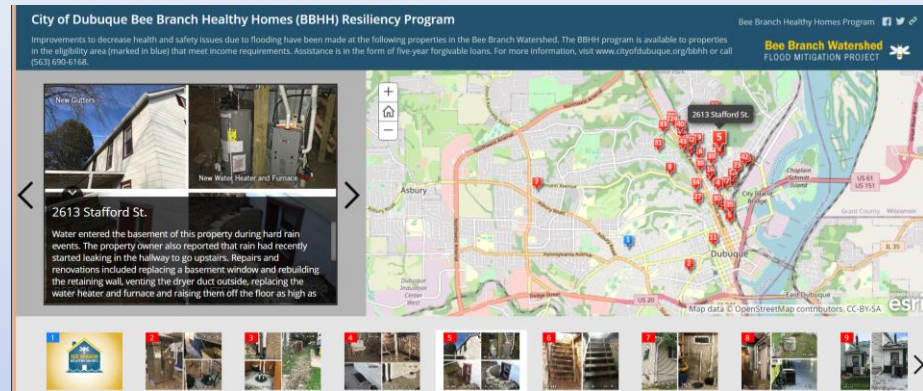

This memo provides a summary listing of programs and funding included in the Inflation Reduction Act of 2022, which passed the Senate on August 7, 2022, to provide investments in a clean energy and climate-smart economy as well as funding for important health care protections and federal deficit reduction. We highlight programs that may be of interest to Sustainable Strategies DC's local government and community clients – and will provide more robust recommendations on how you can pursue these resources if the bill becomes law and as new federal resources are implemented.

In a surprise move on Wednesday, July 27th, Senators Joe Manchin and Chuck Schumer came to an agreement on a piece of legislation they named the Inflation Reduction Act of 2022. The bill garnered strong support from Senate Democrats, House Democratic Leadership, and President Joe Biden, who stated his clear intention to sign the bill once it arrived at his desk. Senate Democratic leaders worked quickly to pass this bill on August 7, 2022 just a day before the scheduled August 8th recess. This was done through the budget reconciliation tool which required the support of only 50 senators (plus a tiebreaker voted by Senate President and U.S. Vice President Kamala Harris), and not the super-majority needed to break a filibuster. Sustainable Strategies DC has reviewed the 725-page [Inflation and Reduction Act of 2022](#) and we have drafted this S² Client Alert to provide early access to its highlights and to help you prepare for its enactment.

The proposed Inflation Reduction Act of 2022 will offer a variety of different programs over the next 10 years. This includes:

- \$369 billion for Energy Security and Climate Change programs
- \$64 billion to support the extension of Affordable Care Act subsidies
- \$288 billion for various reforms to reduce prescription drug costs
- \$313 billion to support a Deficit Reduction through a 15% Corporate Minimum Tax
- \$14 billion to close the carried interest loophole, preventing investors from paying a lower tax rate on their income
- \$124 billion to help reduce the tax gap through stronger IRS enforcement

Measurements & Transparency

From other City examples to a real concept & sample.

ARPA/BIL Projects

This looks at the initiatives taken by the City of Dubuque and community partners using grants under the ARPA/BIL.
