City Department: City Council

Message: As I take to me coworkers and family we are just upset with the idea of more taxes an extra 30 dollar may not seem much to some people but seniors on social security low income family's the price of gas ,food , medicine power and energy is going up and up iowa has is 8.5 percent lower in coming then most states . Stop taxing the lower middle class and giving money to the big corporations to build in dubuque they come in to town use the money pay little no taxes and leave as soon as the tax cuts are over . As for the city employees getting a 9 percent pay increase . For over 2 years u must make appointments the be able to enter many city buildings most of the staff now work from home. Leaving tax payer to still pay for light gas power for building not being uses the way they should .
